Subject: CES Chemical Spill Response Final Report
Date: Wednesday, March 25, 2015 9:47:00 PM

Jeff:

I would like you guys to take out the comparison numbers on the data tables for this report. I am having difficulty finding good comparison data that I feel would accurately represent the short-term risk that would have been associated with this short term spill. All the comparison values overestimate the actual risk.

I would like for you guys to send me the final excel table that was created with the comparison data so that I will have that for my use should I need it.

Please remove the comparison data and have the report reuploaded to the portal for me to do my final review and approval.

Thanks

Gary Moore
